Product description **Table lamp with a porcelain base with a motif of blue dolphins and with an ultrasonic remote control.Type/number of model: HD-2002-1.**

Risk type **Electric shock
Injuries**

Risk description **The product poses a risk of electric shock and injury because: - Insufficient resistance of the polystyrene cover of the hole in the base can not prevent the consumer from touching the live parts. - The requirements for accessible internal wiring on double/reinforced insulation are not met. - The internal wiring is not protected against abrasion in the sharp edges of opening. - The insulation lining in a lampholder is not in compliance with the safety requirements for replacement of the lamp. - The stability of the luminaire is inadequate. - The supply cord is secured by knotting the cord. This product does not comply with the Low Voltage Directive and the relevant European Standard EN 60598.**

Product description **Office chair.**

Risk type **Injuries**

Risk description **This product poses a risk of injury due to its incorrect construction. This chair has inappropriate balance because it falls down when a user presses front and back parts of a seat, the rest arms or when the user sits on the front edge of the seat. Moreover, the seat height adjustment mechanism does not work. This product does not comply with the relevant European Standards.**

Product ** **

Brand **Unknown**

Product description **Angle grinder “A Selection” made of red plastic. Type/number of model: A352.**

Risk type **Electric shock
Fire**

Risk description **The product poses a risk of electric shock and fire because - insufficient insulation resistance and electric strength - when testing the electric strength at a voltage of 4 kV, a flashover occurs between the live parts and the metal part of the grinder; - during durability testing, the grinder operation interrupts permanently several times; - during no-load test at 299 V, after 32 s, the rotor starts to scrape the stator causing excessive sparks and smoke. The product does not comply with the Low Voltage Directive and the European Standard EN 50144.**

Country of origin **Unknown**

Measures taken by economic operators **Other : Voluntary withdrawal from the market and warning of consumers by the distributor and supplier.

Product category **Toys**

Type **Consumer**

Product ** **

Name **Water yo-yo ball; puffer ball**

Brand **Unknown**

Type / number of model **Unknown**

Product description **Description: 1) ball made of coloured plastic, filled with air, with soft bristles, two eyes, containing a hard ball which flashes when the yo-yo is used;2) plastic ball in the form of an eye, filled with a viscous liquid and contained in a box intended for another type of toy called "YO-YO WATER BALL".**

Risk type **Suffocation**

Risk description **This product poses a risk of suffocation because during testing, when swung around in the air, the cord stretched to cover a radius of at least 2 metres. It is therefore possible for the cord to wrap itself around a child's neck (two or three times) when swung around in the air and for the ball, or the other counter-weight, to get stuck in this position when the child jerks his/her shoulders. Once it is wrapped around the neck, the elastic cord exerts pressure, partially blocking blood circulation and making it difficult to breathe. Given that elastic adheres to skin and is very strong, it is difficult for children to disentangle themselves. The product does not comply with the Toys Directive.**

Product **Motorcycle**

Brand **Kawasaki**

EC-type approval/model **ZZR 1400 (ZX 1400 A6F/B6F)**

Product description **Motorcycle 1400 cc "KAWASAKI"**

Risk type **Injuries**

Risk description **The motorcycle's down sensor ensures that the engine cuts out when the motorcycle goes down. In the affected motorcycles, the bolts holding the down sensor may not be properly attached. If the bolts become loose, the down sensor may come out of its bracket, causing the engine to cut out while the motorcycle is being ridden or preventing the engine from cutting out if the motorcycle goes down. If the engine cuts out while the motorcycle is being ridden, or if it fails to stop when the motorcycle goes down, this could be very dangerous and could injure or kill the motorcyclist.**

Product category **Toys**

Type **Consumer**

Product ** **

Brand **Unknown**

Product description **Plastic toy "FUNNY" in shape of a tortoise**

Risk type **Choking**

Risk description **The product poses a risk of choking because the plastic fastener that is attached to the net can create small parts and there is no warning to remove the plastic fastener before giving the toy to a child. Although the label includes a warning that "the toy is not suitable for children under 36 months", the toy is apparently suitable for children at all ages. This product does not comply with the Toys Directive and the Toys Standard.**
