Risk type	Electric shock Fire
Risk description	<p>The notified products pose the risks of fire and electric shock because the cross-section area of the products' internal and external wiring is less than required by the standard.Furthermore, there is no data label attached to the product, bearing the required markings indicating: CE mark, name and data of the manufacturer, type (category) of product and other technical characteristics required by the standard. Some of the notified products bear indication "for internal and external use", while they can be safely used only for internal use. This product does not comply with the Low Voltage Directive and the European standard EN 60598.</p>

Product Portable luminaire for children

Brand Unknown

Product description Category: Lighting equipmentProduct: Portable luminaire for childrenBrand: ESTO AustriaType/number of model: Art. 56294, bar code: 9003348835960

Risk type Burns
Electric shock

Risk description This product poses a serious risk of: - electric shock because the product is marked with class II symbol instead of class III, rated voltage indicated on the product is 230V~, while it is designed to operate on 12V~, and it is not marked on the luminaire that it is for operation only with a short-circuit-proof isolating transformer or toys transformer; - burns because the lampshade becomes detached during testing with spring-operated hammer with impact energy of 0,7Nm and the fall test from height 850mm. The lamp, which therefore becomes accessible, reaches during heating test temperature of 271° C and shade, which is also accessible, reaches temperature of 96° C. The maximum allowed temperature for accessible non-metallic parts is 75° C. This product does not comply with the Low Voltage Directive and the relevant European standard EN 60598.

Product 2-slice toaster

Brand Unknown

Product description Category: Household appliances Product: 2-slice toaster Brand: LOVEN Type/number of model: LV-37

Risk type Electric shock
Fire

Risk description This product poses a serious risk of electric shock because: - the insulation of the wires is not appropriate (flashover occurred), - the internal wiring and mains cable can get damaged due to the presence of sharp edges and sharp points of screw-ends, - there is no cord anchorage. When the abnormal operation was tested the cover of the appliance caught fire thus a risk of fire is also present. This product does not comply with the Low Voltage Directive and the relevant European standard EN 60598.

Product Harley-Davidson motorcycles - Battery Caddy Bolt

Brand Unknown

Product description Category: Motor vehicles
Product: Harley-Davidson motorcycles - Battery Caddy Bolt
Brand: HARLEY-DAVIDSON
Type/number of model: Model FD2 DYNA, 2006 model year - motorcycles built from 17 June 2005 to 6 February 2006

Risk type Fire

Risk description The affected motorcycles contain a battery caddy bolt, which may loosen under normal riding conditions. Should this occur, the bolt can back out which allows the battery to shift position and then hold the battery in a position which may allow the battery terminals to contact the metal battery caddy cover and abrade through the positive terminal protective boot. If this occurs, the battery can short against the cover, causing sparks and possibly a fire, which could cause an accident leading to injury or death.

Risk type Burns
Electric shock

Risk description The product poses a risk of electric shock and burns because:
 - the plug has no fuse contrary to requirements and therefore overheating in an overload or fault condition is likely; - internal connections are not permanent and non-rewirable plug can be separated with a general purpose tool; - it is possible to change the lamp whilst the nightlight is plugged into a socket; - the nightlight shade is shaped in a way likely to be used as a toy by children; - the nightlight is likely to be plugged into a low level socket making access easy for children to the hot lamp and therefore a burn hazard is evident. The product does not comply with the Low Voltage Directive and the relevant European standard EN 60598.
