Risk type **Fire**

Risk description **The dual mass flywheel may become damaged due to the configuration of the restrictor passage in the bleeder valve in the hydraulic pressure line for clutch actuation. This can happen if the clutch is engaged very abruptly, for instance if the pedal is allowed to spring back by itself. After causing unusual mechanical noises, the dual-mass flywheel will eventually fail completely. In unfavourable conditions this can lead to a fire in the vehicle.**

EC-type approval/model	<b>Bar code on engine block: 05121174. Example engine block no: 147FMD05121174. Example VIN: LXESA14085E917487.</b>
Risk type	<b>Burns Fire Injuries</b>
Risk description	<b>This product poses a serious risk of fire, burns and injuries because fuel is being vented out in front of rider which has health, machine control and fire hazard implications. In particular, there is a risk of: - fire because the fuel pipe is not secured and information regarding stop/switch/tap positions of the fuel system is insufficient; - burns because apertures adjacent to rider's feet are insufficiently guarded to prevent child's foot from touching engine block; - injuries because the chain and the sprocket are insufficiently guarded and expose parts within 500mm of seat. In addition, there are sharp frontal projections over vehicle's front lights. The product does not comply with the Machinery Directive.</b>

Product **Laser epilator**

Brand **EPILA**

Type / number of model **Laser SI-808**

Risk type **Damage to sight  
Electric shock  
Injuries**

Risk description **This product poses a serious risk of damage to sight, skin lesions and electric shock because of insufficient insulation and protection against laser radiation if used incorrectly. In particular: - the laser beam is highly effective at a distance of 2-3 cm from the spacer on all settings (low, middle, high). This is sufficient to cause irreversible retina damage, among other things; - it is likely that the product can be classified as Laser Class 4 contrary to Class IIIb as labelled; - the product has accessible live parts through the power supply voltage to earth of 230 V~/50Hz causing risk of electric shock; - the product does not have: the required access control (keypad code, key, etc.) or the required time switch that reacts when the device is idle and automatically switches it off; - the required safety lock (the laser can be operated without any controlled function enable, e.g. body resistance measurement, or similar). Moreover, even if the instructions recommend that the product device be kept out of children's reach, the possibility of damage resulting from foreseeable misuse cannot be ruled out, mainly due to lack of access control and safety lock. The product does not comply with the Low**
