Product **Pushchair - combined child stroller**

Brand **SCOUT X**

Type / number of model **Unknown**

Risk type **Injuries**

Risk description **The product poses a risk of injuries because: - an accessible gap can be created while using the vehicle by pressing a handle, which may cause injuries to the forearm or elbow of the child sitting in the vehicle; - the maximum available wheel movement exceeds the prescribed values; - some warnings are missing. The product does not comply with the relevant European standard EN 1888.**

Product **Passenger cars - Volkswagen Transporter**

Brand **VOLKSWAGEN**

Product description **The affected chassis numbers are. WV2ZZZ 7H Z 4 H 000 154 WV2ZZZ 7H Z 5 H 000 025 WV .ZZZ 7H Z 6 H 000 027 WV2ZZZ 7H Z 4 X 026 035 WV2ZZZ 7H Z 5 X 000 029 WV2ZZZ 7H Z 6 X 000 200 WV2ZZZ 7H Z 7 X 000 002 to WV2ZZZ7H Z 4 H 111 920 WV2ZZZ7H Z 5 H 108 546 WV ZZZ 7H Z 6 H 141 328 WV2ZZZ7H Z 4 X 042 607 WV2ZZZ7H Z 5 X 031 776 WV2ZZZ7H Z 6 X 037 493 WV2ZZZ7H Z 7 X 000 002. The affected Volkswagen Transporters were produced between March 2005 and August 2006.**

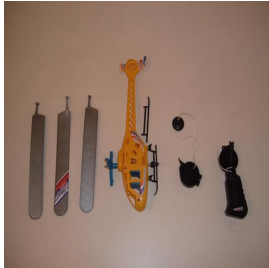

Risk type **Injuries**

Risk description **This product poses a serious risk of injuries because the backrest of the second seat row may not completely slot in because of a too short Bowden cable. In an accident the occupants of the second row would be at a higher risk of injuries than those in the first row as it is the attachment of their seatbelt attached to the backrest that is affected.**

Type / number of model

**LC-D500EXP**

Risk type

**Electric shock**

Risk description

**This product poses a risk of electric shock because - there is not sufficient electrical insulation between the primary circuit connected to the mains and the secondary circuit that can be touched. The secondary circuit can be touched via the product connected to the output of the power supply unit. In particular: - clearances/creepage distances in transformer T2 between the primary and the secondary windings are less than 4 mm/5 mm; a minimum of 0.2 mm between the primary winding and the output wires of the secondary winding and 0.5mm between the secondary winding and the output wires of the primary winding are measured; on the output wires there are not insulation tubes; - clearances/creepage distances in transformer T3 between the primary and the secondary windings are less than 4 mm/5 mm; a minimum of 0.3 mm between the primary winding and the output wires of the secondary winding and 0.3 mm between the secondary winding and the output wires of the primary winding are measured; on the output wires there are not insulation tubes. This product does not comply with the Low Voltage Directive and the relevant European standard EN 60950.**

Type **Consumer**

Product **Plafond (light binding) 812 RENO**

Brand **Prezent**

Type / number of model **Antic Brass Satin**

Barcode **8586007084271**

Risk type **Electric shock  
Fire**

Risk description **This product poses a risk of electric shock and fire because:**  
- the insulation lead may overheat while functioning; - usage of the constrictor in the earthing system to fix the adaptor, does not secure it from relieving, which may cause improper functioning of the plafond and result in electric shock while touching the plafond cover; - there is no operating information (e.g. bulb change scheme) in the user manual; - the size of letters in symbol specifying minimal distance from the floodlit object is too small (the symbol is unreadable - in the case of improper assembling of the lamp overheating of the illuminated object may cause fire). This product does not comply with the Low Voltage Directive.
