

Alert number 0950/10

Notifying country	Hungary
Product category	Lighting equipment
Type	Consumer
Product	Rechargeable torch - LED
Brand	GDLITE
Type / number of model	GD-2911-B
Barcode	2 008003580121
Product description	Torch with LED and halogen light sources. The package also includes a cable for recharging directly from the mains supply. A switch is used for selecting the LED or halogen operation.
Risk type	Electric shock Fire
Risk description	The product poses a risk of electric shock and fire because: - the torch can be opened without using a tool while it is connected to the mains supply, thus live parts are accessible; - the construction of the mains cable does not comply with the requirements and live parts could be touched during use; - the cross-sectional area of the conductors in the cable is too small. The product does not comply with the Low Voltage Directive (LVD) and the relevant European standard EN 60598.

Product category	Machinery
Type	Consumer
Product	Cutter for lawn trimmer - Terminator 4
Brand	Attila
Type / number of model	Unknown
Product description	Cutter to be fitted to a lawn trimmer; instead of a rotating plastic thread, there is a rotating disc with four chain loops similar to the chains of chain saws. This is intended to enable the user to cut dense undergrowth, branches and bushes. Only supplied for retro-fitting.
Risk type	Injuries
Risk description	The product poses a risk of injuries because: - the chain links can break; - the wire guard on the lawn trimmer does not provide adequate protection for this type of cutter. One fatal accident reported involving a similar model. The product does not comply with the Machinery Directive.
Country of origin	Italy
Measures taken by economic operators	Other : Voluntary withdrawal from the market. Other

Product category Motor vehicles

Type Consumer

Product Motorcycle

Brand Honda

EC-type approval/model VFR1200F. Internal code SC63

Product description 1237 cc motorcycle.

Risk type Injuries

Risk description The product poses a risk of injuries because under certain conditions, the engine's internal lubrication lines could be restricted by aluminium particles, reducing the lubrication capacity and increasing the friction of the parts, which could, ultimately, lead to engine seizure.
