Product Passenger car 307, 308, 407, 607, 807, EXPERT

Brand Peugeot

EC-type approval/model The recall concerns certain vehicles manufactured between 15/12/2006 and 31/03/2009: 307: Certain vehicles between VIN VF33CRHRH84860255 and VIN VF33HRHRJ85155411 308: Certain vehicles.....

Product description Passenger car

Risk type Injuries

Legal provisions (at EU level) and European standards against which the product was tested and did not comply The product poses a risk of injuries because, in very rare cases, the vacuum pump valve may suffer from opening problems, leading to an occasional reduction in braking assistance, which could lead to a road accident.

Alert number	<u>0157/11</u>
Notifying country	Greece
Product category	Motor vehicles
Type	Consumer
Product	Passenger car Grand Vitara 2.4L
Brand	Suzuki
EC-type approval/model	Grand Vitara 2.4L (JB424). The recall concerns vehicles produced from 02.06.2008 to 20.10.2010, with VINs from JSAJTDA4V00100061 to JSAJTDA4V00201579.
Product description	Passenger car
Risk type	Injuries
Legal provisions (at EU level) and European standards against which the product was tested and did not comply	The product poses a risk of injuries because the internal spring of the tension adjuster for the drive belt (that operates the generator, water pump, air conditioner compressor, and power steering pump) may break. As a consequence, the tension of the drive belt will not be adjusted and, in the worst case, the belt may come off the power steering pump pulley and driver will need increased effort to steer the vehicle which could lead to a road accident.

Alert number	<u>0158/11</u>
Notifying country	Greece
Product category	Motor vehicles
Type	Consumer
Product	Passenger car 4007
Brand	Peugeot
EC-type approval/model	The recall concerns certain vehicles with VINs from VF3VVSFZC8U907717 to VF3VVSFZF8U910604.
Product description	Passenger car
Risk type	Fire
Legal provisions (at EU level) and European standards against which the product was tested and did not comply	The product poses a risk of fire because on affected vehicles, electrical connectors intended to supply the electric front seats fitted to some versions are not used and are located under the rear footwell floor carpets. If these connectors come into contact with water and road salt, they may corrode over time and cause localised electrical overheating.

EC-type approval/model The recall concerns certain vehicles with VINs from VF30E5FV89S145027 to VF30E5FVAAS240340.

Product description Passenger car

Risk type Fire

Legal provisions (at EU level) and European standards against which the product was tested and did not comply The product poses a risk of fire because the water entering the rear door may penetrate the electric window motor and cause the mechanism to malfunction. Eventually, the presence of humidity could cause the motor to short circuit, which could lead to localised overheating of the door panel and the risk of fire.

Product Passenger car "Outlander"

Brand Mitsubishi

EC-type approval/model CW0W. The recall concerns model year 2007-2008 vehicles without power seats, produced until January 29, 2008.

Product description Passenger car

Risk type Fire

Legal provisions (at EU level) and European standards against which the product was tested and did not comply  
The product poses a risk of fire because some vehicles without power seats have an unused power seat connector under the front seats, which is powered even when the ignition is switched off. If snow and road salt penetrate the housing of this connector, corrosion of the connector terminals can occur, leading to the possibility that the connector will melt due to burning.

Brand	Volvo
EC-type approval/model	Model Year 2007. Chassis numbers C30: 0000073-0010313 S40: 0250037-0296638 V50: 0270042-0313561 with engines B4164S3, B4184S8, B4184S11 and B4204S3.
Product description	Passenger car
Risk type	Fire
Legal provisions (at EU level) and European standards against which the product was tested and did not comply	The product poses a risk of fire because water could penetrate into the electric cooling fan control unit and this could result in a short circuit and, in the worst scenario, a fire. Since the fan is permanently connected to the battery voltage, a fire could occur when the vehicle is parked, with the ignition switched either on or off. Four incidents of fires reported in Sweden.
