Product **Passenger car "Accord"**

Brand **Honda**

EC-type approval/model **e6*2001/116*0115*XX e6*2001/116*0122*XX**

Product description **Passenger car. [VINs are attached](http://ec.europa.eu/consumers/images/rapex/2011-w29/2011-w29_7-vins.pdf).**

Risk type **Injuries**

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The product poses a risk of injuries because, due to an inappropriate software setting of the Engine Control Unit, the oil level can increase too much in the engine. There is a possibility that some engine oil may enter the combustion chamber during driving. If this happens the vehicle may not decelerate as intended when the throttle pedal is released. If the clutch is disengaged or neutral is selected, the engine may continue to run even if the ignition switch is turned off. 18 incidents reported

On the housing there are two different hooks. The main components of the lamp: mains supply cable with inscription "VDE ÖVE KEMA-KEUR" + ESTI FIMKO DEMKO NE**

Risk type **Electric shock**

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The product poses a risk of electric shock because: - the mains supply cable is insulated with PVC instead of the standard polychloroprene, - the cable insulation can be damaged and the live parts of cable can become accessible, - in case of outdoor use the water can come into the lampshade, and the socket-outlet where live parts can be found. Therefore electric shock may occur if the user touches the wet lampshade or plug. The product does not comply with the Low Voltage Directive (LVD) and the relevant European standard EN 60598.
