Product Wristwatch strap

Brand Watch Star

Type / number of model DUA REC1 12 mm

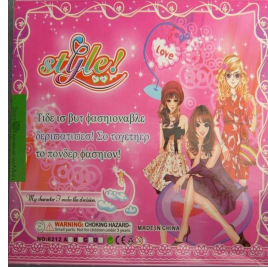

Product description Ladies' wristwatch strap, black leather, 12 mm, grained surface, with silver-coloured buckle.

Risk type Chemical

Legal provisions (at EU level) and European standards against which the product was tested and did not comply The product poses a chemical risk because it contains chromium (VI) in a concentration of 6.1 mg/kg and, when used as intended, the strap is in contact with the skin for a long period of time. Chromium (VI) is classified as sensitising and may trigger allergic reactions. The product does not comply with national legislation.

Product Pushchair

Brand Stsinghua

Type / number of model QH-121

Product description Summer model pushchair with a red embroidered inscription in a foreign language. It is available in various colours. The product is sold in transparent polyethylene packaging.

Risk type Injuries

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The product poses a risk of injuries because - in the accessible area there are cutting and squeezing points between the moving parts, which close at a distance of less than 12 mm (the holding mechanisms of the hood), which may cause entrapment and squeezing of the child's fingers; - in the accessible area there are accessible openings bigger than 5 mm, smaller than 12 mm, and deeper than 10 mm, which may lead to entrapment and squeezing of the child's fingers, thus causing injuries or fractures; - the fabric of the seat is not sufficiently tightened nor well-attached, which may cause the child to fall from the pushchair; - the textile parts that are intended to hold the child in place did not withstand testing and, as a result, there is a risk that the child may fall from the

pushchair; - the pushchair has only one locking mechanism (in order to avoid the risk of unintentional folding of the pushchair due to actions performed by the adult or the child); the pushchair must have at least two locking mechanisms). In addition, the packaging does not have the required warnings and instructions for use in Bulgarian. The product does not comply with the relevant European standard EN 1888.

Type Consumer

Product LED light bulb

Brand Highlight

Type / number of model IPCS 0QC3 24W E27

Product description Large LED light bulb with six vertical rows of LEDs arranged in a star formation; weight approx. 1 kg.

Risk type Electric shock

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The product poses a risk of electric shock because - the internal wires reach the cooling body through holes which have not been de-burred. This creates a risk of the wires being damaged by the sharp edges; - under a test voltage of approx. 1 000V AC between the lamp holder and the touchable cooling body there is a flow of current (breakdown). The insulation between electrically active parts and metallic touchable parts is thus inadequate; - according to the manufacturer's information this is a light bulb for use outdoors. The stated type of protection (IP 55) cannot be complied with by the open cooling body with the internal wires. Consequently, in the case of water ingress (which can be expected), there is a risk of electric shock; - it is possible to touch the internal wires or the terminal

connections on the cooling body with the fingers. In addition, the light bulb weighs approx. 1 kg (by way of comparison, a normal light bulb weighs only approx. 30 g). Consequently, the light bulb engenders a high tensile and/or bending load on the lamp holder. In addition, there is no declaration of conformity by the EU distributor, no address given for the manufacturer or its authorised representative, no CE mark and no information on type designation, voltage, power, frequency or instructions for use. The product does not comply with the Low Voltage Directive (LVD).

 b) ENLT-T10060SMD-01  
 c) 24W CW Eneltec  
 d) T 10 LED Tube Light

Batch number -

Product description LED tube lights which look like conventional replacement fluorescent tubes but for which the original light fitting must be modified.

Risk type  
 Electric shock  
 Fire

Legal provisions (at EU level) and European standards against which the product was tested and did not comply  
 The product poses a risk of electric shock because it can only be used if the existing light fitting is modified. Modifying the light fitting creates hazards for users as it is not possible to ensure, for example, that the necessary insulation distances are observed. No instructions are provided on how to install the tube lights/modify the light fittings. Replacing the LED tube light with a fluorescent tube can cause a short circuit. In addition, no complete address provided for manufacturer or

authorised representative, no information on the product, such as CE mark, type designation, voltage, power, frequency is provided. The product does not comply with the Low Voltage Directive (LVD).
