Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The wiper-arm mechanism may chafe against the brake booster vacuum line. If this occurs, it could lead to a gradual reduction of the power-assisted braking and more effort would need to be applied to the brake pedal than usual to slow the vehicle down. In the worst cases, the reduction of braking assistance could occur suddenly without any prior warning.

Risk type

**Chemical
Choking**

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The product poses a chemical risk because it contains 235.61 mg/kg by weight dimethylfumarate (DMF). Dimethylfumarate is a substance which is strongly sensitising on contact with the skin, and consumer products containing dimethylfumarate are banned according to the REACH Regulation. The product also poses a risk of choking because it contains small parts (a rhinestone) that may easily detach and be swallowed by small children.
