Product	Passenger car
Name	Tribute
Brand	Mazda
EC-type approval/model	Tribute (EP) with 3.0L engine and cruise control.
Production dates	LHD vehicles: Production date range: 30 May 2000 to 10 December 2004 RHD vehicles: Production date range: 09 February 2001 to 09 January 2004.
Product description	The recall affects vehicles with 3.0L engine and cruise control (LHD and RHD).
Risk type	Injuries
Legal provisions (at EU level) and European standards against which the product was tested and did not comply	There may be inadequate clearance between the engine cover and the cruise control cable, which could allow the throttle to stick in the fully open position when the accelerator pedal is fully or almost-fully depressed. If this occurs, it would be difficult to stop or to decelerate, which could lead to an accident. This risk exists regardless of whether or not the cruise control is used.

Product description	Van.
Risk type	Injuries
Legal provisions (at EU level) and European standards against which the product was tested and did not comply	The pivot pin used to connect the driver and passenger side wiper arms to the wiper arm heads can become loose, causing the wiper arm to lose tension to the windshield and possibly allowing the arm to separate. If a wiper arm separates while driving, a loss of windshield wiper function could occur on that side, possibly reducing visibility and leading to the risk of an accident.

Risk type	Injuries
Legal provisions (at EU level) and European standards against which the product was tested and did not comply	On vehicles equipped with “one push” or “keyless” start function, the clutch switches are monitored to check they are functioning correctly. This monitoring function is not sufficient to detect a switch malfunction in all cases. If the clutch switch fails and is not detected correctly, it may be possible to start the car in gear without the clutch being depressed. This unexpected vehicle behaviour may cause an accident.
