Risk type

Electric shock
Fire

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The mains adaptor poses a risk of electric shock and fire because:

- The electrical insulation is not sufficient.
- The clearances and creepage distances are not sufficient.
- The plastic material of the enclosure can catch fire. The product does not comply with the Low Voltage Directive and the relevant European standard EN 60950.

Product description Climbing rope ascender.

Risk type Injuries

Legal provisions (at EU level) and European standards against which the product was tested and did not comply In certain circumstances, rather than locking on the rope as expected, the product may slip when initially loaded which could result in the user falling. This slippage is more likely to occur when the rope is under significant tension and the cam of the product has not been specifically set in position on the rope by the user. Once the cam has been properly located on the rope, and the product loaded without slippage, the device will perform as expected.
