Risk type Burns
Electric shock

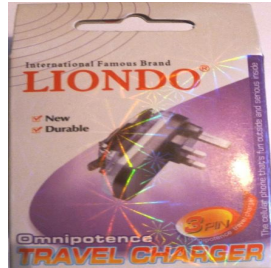

Legal provisions (at EU level) and European standards against which the product was tested and did not comply The product poses a risk of burns and electric shock because:
- the cross-sectional area of the external and internal wires is less than the minimum requirement. - the wire ends soldered to terminals of the rectifying unit and the LEDs are not adequately protected against pulling and twisting. -the accessible wires have only basic insulation and come into contact with sharp edges of the flashing switch and control

unit. In case of damage, live metal parts become accessible.
The product does not comply with the Low Voltage Directive
and the relevant European standard EN 60598.

Brand Toyota

EC-type approval/model FJ Cruiser, production years 2007-2013

Product description Passenger car

Risk type Injuries

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The front seat belts, with their retractors, are mounted in the rear doors. Owing to the inadequate strength of the metal used for the rear doors, repeatedly closing of the doors, forcefully over a long period, may result in cracks. This could cause the seat belt retractors to become loose and, as a result, it is no longer certain that persons in the front seats will be secured in the event of an accident.

Product Rechargeable torch

Name LED 2 in 1 rechargeable search light

Brand Jiage

Type / number of model YD-888

Batch number Unknown

Product description Rechargeable torch which can be charged with the telescopic pins of the built-in plug. Supplied with a plug adaptor. Packaged in a cardboard box

Risk type Electric shock
Fire

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The product poses a risk of electric shock and fire because:

- The user may touch the live pins of the plug when inserting the plug into the adaptor,
- single-pole insertion of the plug into the adaptor is possible, leaving the free remaining pin accessible,
- the protective cover can be removed by hand during charging, leaving live parts accessible,
- the cross-sectional area of the cores of the wires is too small and, in case of a short circuit, the wires

could overheat, · the plastic part near the pins is not sufficiently heat and fire resistant. The product does not comply with the Low Voltage Directive and the relevant European standard EN 60598.
