Homeplug - Internet via the powerline

Brand

SITECOM

Type / number of model

**Serial number: 2N17062009479
Supplier code: LN516 v1 001**

Batch number

8716502023875

Product description

The product includes a socket for electrical appliances and one for internet connection (fast ethernet port). The product allows to extend the home network and to keep the electrical outlet available.

Risk type

Electric shock

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The product poses a risk of electric shock because there are no shields in front of the recesses. The internal connectors are not sufficiently protected or immobilised in order to prevent a short circuit between the parts under mains voltage and the internet circuit. The product does not comply with the relevant European standard EN 60950 and with national standard CEI 23-50:2007.

Type / number of model **Unknown**

Batch number **EAN code 66059632432**

Product description **216 small ball shaped magnets packed in a black and red metal box. On the back part of the box there is information and warnings about the magnetic risk, barcode and importer's details.**

Risk type **Choking
Injuries**

Legal provisions (at EU level) and European standards against which the product was tested and did not comply **The product poses a risk of injuries (intestinal blockage) because the balls have a too high magnetic flux value and if more than one small magnet is swallowed, they can become attracted to one another through the gut wall, causing perforation or blockage. The magnetic balls also group together easily and pose a risk of choking if swallowed by children. The product does not comply with the Toy Safety Directive and with the relevant European standard EN71-1.**

Product description

Led floodlight Sold in a green and grey cardboard box. Technical specifications: DS-50W, 220V, class I, IP65

Risk type

Electric shock

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The product poses a risk of electric shock because: - The accessible metal parts of the luminaire have not been earthed. The basic insulated conductors of the supply cord touch the body of the luminaire (the fixed wiring does not fit together with its sheath in the protective pipe). - The distance between the terminal of the LED module and the body of the luminaire is not sufficient. The product does not comply with the Low Voltage Directive and the relevant European standard EN 60598.

Burns

Risk type	Electric shock
Legal provisions (at EU level) and European standards against which the product was tested and did not comply	The product poses a risk of burns, electric shock because: - The protective bulb, serving as additional insulation, can be easily removed during charging. As a result, live parts of the LED panel could be accessible to the user. - The cross section area of the core is less than required, and in case of short circuit, the internal wires may overheat. - The dimensions of the built-in plug do not comply with the relevant standard. During connection, the user may touch the pin of the plug in order to better positioning. The structure of the adaptor enables single-pole insertion of the plug. As a result, live parts are accessible to the user. The product does not comply with the Low Voltage Directive and the relevant European standard EN 60598.
