Orange and black: 0256898000039

Product description Children's pushchair in green/black and in orange/black colours, supplied with a bag and placed inside a white cardboard box.

Risk type Injuries
Suffocation

Legal provisions (at EU level) and European standards against which the product was tested and did not comply The product poses a risk of injuries because: - the restraining system is not safe and the child may fall; - the braking device does not activate simultaneously on all rear wheels by one single movement; - the bolt of the seat module can easily break; - the wheeled conveyance is not adequately fixed and can move when put on an inclined plane. Moreover, the product poses a risk of suffocation to children due to

insufficient warnings on the plastic material of the packaging.
The product does not comply with the relevant European
standard EN 1888.

Product description Blue bicycle for young children (5-8 years old) decorated with colourful stickers. The bicycle has a back-pedal brake and is equipped with support wheels. Packaging: bubble foil wrapped around the frame.

Risk type Injuries

Legal provisions (at EU level) and European standards against which the product was tested and did not comply The product poses a risk of injuries because the clamp of the bell has sharp edges; and when using the back-pedal brake, the time to brake is increased due to the high difference between the driving and braking positions of the pedal crank, which is higher than the permitted 60°. The chain-guard does not completely cover the edge of the chain, with the risk that clothing may get caught. Furthermore, the static strength of the saddle is not suitable, since the seat is removable, and

the support wheels bend when a vertical load is applied, which could impair the balance of the bicycle and cause small children to fall and suffer injuries. The product does not comply with the relevant European standard EN 14764.

Risk type Burns
Electric shock

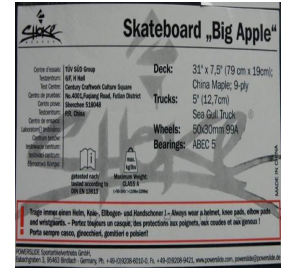

Legal provisions (at EU level) and European standards against which the product was tested and did not comply The product poses a risk of electric shock and burns because:
-The cross-sectional area of the core in the mains supply cord is less than the requirements. In case of short-circuit the wire may overheat and can cause burns. -The dimensions of the plug are less than the requirements and therefore the user

may touch the pin of the plug during connection. -The wire end of the mains supply cord is not adequately protected against pulling and twisting, therefore they may become free and accessible. -The basic insulated internal wiring can come into contact with touchable metal parts of the torch and the insulation sleeves on its terminals are not fixed. -The protective lampcover can be removed by hand during charging, and basic insulated live parts of the LED panel are accessible. The product does not comply with the Low Voltage Directive and the relevant European standard EN 60598.
