Product Games console

Name Wii U

Brand Nintendo

Type / number of model Plug adapter: PC 9906  
 Power supply: WUP-002(UKV), TDFA27C06, WUF-A-ADTY-UKV-CO  
 Power supply: WUP-011(UKV), MMFA01R01, WUP-A-ADMM-UKV-PO

Batch number Only products sold in 2013 with one of the above-mentioned power supplies and the above-mentioned plug adapter are affected.

Product description Games console supplied with a power supply ("AC Adapter") and a white "schuko" to UK plug adapter. The plug adapter was not manufactured by or for Nintendo but by an unknown third party and was included in the packaging of the affected products without Nintendo's knowledge or consent when they were

Risk type Fire

The pins of the plug adapter are too small. The UK earth pin

Legal provisions (at EU level) and European standards against which the product was tested and did not comply	makes it hard to insert the plug adapter in Swedish socket outlets. The plug adapter can become partly disconnected due to external influence. These defects can all result in a bad connection and heat production. The product does not comply with the requirements of the Low Voltage Directive and the relevant national standard.

Product	Passenger car
Name	Opel GT
Brand	Opel
EC-type approval/model	Type: K/R, WVTA: e13*2001/116*0170*01 - 04
Production dates	The problem affects vehicles manufactured between 2007 and 2008. In addition, the defective ignition switches may have been installed during repairs in vehicles manufactured between 2008 and 2010.
Product description	Passenger car
Risk type	Injuries
Legal provisions (at EU level) and European standards against which the product was tested and did not comply	Under certain conditions, there is a risk that the ignition switch may move out of the “run” position, resulting in a partial loss of electrical power and turning off the engine. When the ignition switch is not in the run position, the air bags may not deploy if the vehicle is involved in a crash, increasing the risk of injury or fatality. Some vehicles may also have a condition in which the ignition key may be removed when the ignition is not in the “Off” position. In such an event, unintended vehicle motion may occur, resulting in a vehicle crash and occupant or pedestrian injuries.
