Production dates **The vehicles in question were manufactured from May 1999 to August 2006.**

Product description **Passenger car**

Risk type **Injuries**

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

**The frontal passenger-side inflators could create excessive internal pressure during air bag deployment after long-term exposure to high absolute humidity environments. In a worst case scenario, the inflator may rupture, possibly causing injury. Even if the inflator does not rupture, due to the specific design of the frontal passenger-side airbag module with its integrated inflator, excessive internal pressure of the inflator could potentially result in an increased risk of airbag-induced injuries in a deployment event.**
