Articulated jack

Brand

Biltema

Type / number of model

Art. n°: 15-367, EJ-20, 13,5 V, 2000 kg

Batch number

6438284102211

Product description

Electrically driven articulated jack with a grey frame.

Risk type

Injuries

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The jack is not sufficiently strong when loading the rated load, and can break down when lowering which could lead to the user being injured. One accident reported. The product does not comply with the requirements of the Machinery Directive and the relevant European standard EN 1494.

Product **Telescopic ladder**

Name **Aluminium Telescopic Ladder**

Brand **Unknown**

Type / number of model **Model: 020S (308), Height 3.8m; N° of Rungs 13.**

Batch number **Unknown**

Product description **Aluminium, height-adjustable, telescopic ladder. If the stop is released, the ladder retracts under its own weight. Maximum height: 380 cm. Retracted height: 79 cm. Weight: 10.8 kg.**

Risk type **Injuries**

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The rungs of the ladder can be extended in no particular order, so that a block formation of multiple rung elements is possible. This results in different rungs distances. If the locking mechanism of the ladder is released, the impact force may cause injuries to the users' hands and fingers. There is no clear indication whether the rung locking is engaged and therefore secure. These defects may also lead to a situation where individual upright sections are not locked when the ladder is extended, and the user may fall while climbing up. In addition, the instructions for use and the warning notices are not in the national language. The product does not comply with the relevant European

standard EN 131.

Risk type **Electric shock
Fire**

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The product poses a risk of electric shock because the accessible basic insulated wires can be damaged and the lampholder contacts are not reliably secured. Therefore, the live wires may become accessible. The product poses a risk of fire because: - the dimensions of the wires are less than required and therefore the wires could overheat, - the lamps in the lampholders may be easily rotated, and - the heat and flame resistance of the plastic of lampholders is not sufficient. The product does not comply with the

requirements of the Low Voltage Directive and the relevant European standard EN 60598.

Risk type **Injuries**

Legal provisions (at EU level) and European standards against which the product was tested and did not comply **It is possible that when the front spring/shock absorber assemblies were installed the bolts securing the lower ball joint and/or the cross-members were tightened with insufficient torque. The securing bolts of the lower ball joint and/or the cross-members may become loose and fall out. If both bolts on one side fall out, the lower ball joint will detach from the steering knuckle and/or the cross-member from the sub-frame, causing a loss of steering control and increasing the risk of an accident.**

Country of origin **Japan**

Measures taken by economic operators **Recall of the product from end users

Product category **Motor vehicles**

Type **Consumer**

Product **Passenger car**

Name **C-Crosser**

Brand **CITROEN**

EC-type approval/model **Model: C-CROSSER**

Production dates **Recall Code NDD: Vehicles concerned are produced from 16/04/2007 to 01/06/2009 with VINs from VF7VV4HNNH8U950205 to VF7VV4HNNH9Z952952. The recall Code NDC: vehicles concerned are produced from 01/11/2007 to 29/05/2009 with VINs from VF7VVSFZC8U957007 to VF7VUSFZF9Z952953.**

Product description **Two different recalls because of different defects, on partially overlapping vehicle production periods.**

Risk type **Injuries**

Legal provisions (at EU level) and European standards against which the product was tested and did not comply **In all vehicles, silicone grease may have contaminated the brake lamp switch contacts; this can prevent the stop lamps operating when the footbrake is applied. In vehicles produced between 01/11/2007 to 29/05/2009, the defective material of the accessory drive belt could damage the pulleys, which may result in faulty warning lamp illumination, battery depletion, loss of power steering and engine overheating.**

Product category **Toys**

Type **Consumer**

Product **Set of plastic dolls**

Name **Happy Family**

Brand **Cigioki**

Type / number of model **Unknown**

Batch number **8034048167366**

Product description **Set of two dolls (a baby and a girl doll) with accessories, supplied in pink cardboard packaging.**

Risk type **Chemical**

Legal provisions (at EU level) and European standards against which the product was tested and did not comply **The heads of the two dolls contain di-2-ethylhexyl phthalates (DEHP) above the permitted levels (measured values up to 30% by weight). This phthalate may harm the health of children, causing possible damage of the reproductive system. According to the REACH Regulation the phthalates DEHP, DBP and BBP are prohibited in all toys and childcare articles.**

Country of origin **People's Republic of China**

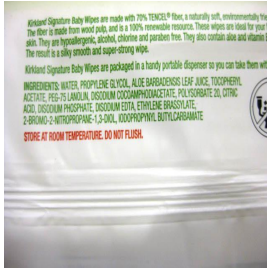

Measures ordered by public authorities **Ban on the marketing of the product and any accompanying measures

Product **Baby wipes**

Name **Baby wipes, ultra soft**

Brand **Kirkland Signature**

Type / number of model **Unknown**

Batch number **9661939449**

Product description **Wet wipes wrapped by 100 pieces in a repeatedly self-sealing package with flip-top lid. White and light green colour package. Inscriptions on the front side of the packaging: Soft pack, with flip-top lid.**

Risk type **Chemical**

Legal provisions (at EU level) and European standards against which the product was tested and did not comply **The product poses a chemical risk due to the presence of Iodopropynyl butylcarbamate (IPBC), which is banned in products intended for children under 3 years of age. IPBC may be absorbed by the skin of the infant and may have an adverse effect on the function of thyroid gland. The product does not comply with the requirements of the Cosmetics Regulation.**
