Product Mobile phone with charger

Brand XIAOMI

Type / number of model Charger: CH-P002

Product description Mobile phone with charger and a flat plug adapter. Packaging: cardboard box.

Risk type Electric shock

Legal provisions (at EU level) and European standards against which the product was tested and did not comply The insulation between the primary and the secondary circuit of the charger is not sufficient, which may cause an electric shock. The pins of the converter plug adapter do not have an insulating collar, so when inserting the plug the user may touch the live pins. The plug adapter allows single-pole insertion of the charger, leaving the remaining free live pin accessible. The product does not comply with the requirements of the Low Voltage Directive and the relevant standards EN 60950 and IEC 60884.

Product Submersible pump

Name Pompa rozdrabniacz / Tauchmotorpumpe

Brand Heidmann

Type / number of model G81423

Batch number 5901477121944

Product description Submersible pump

Risk type Electric shock

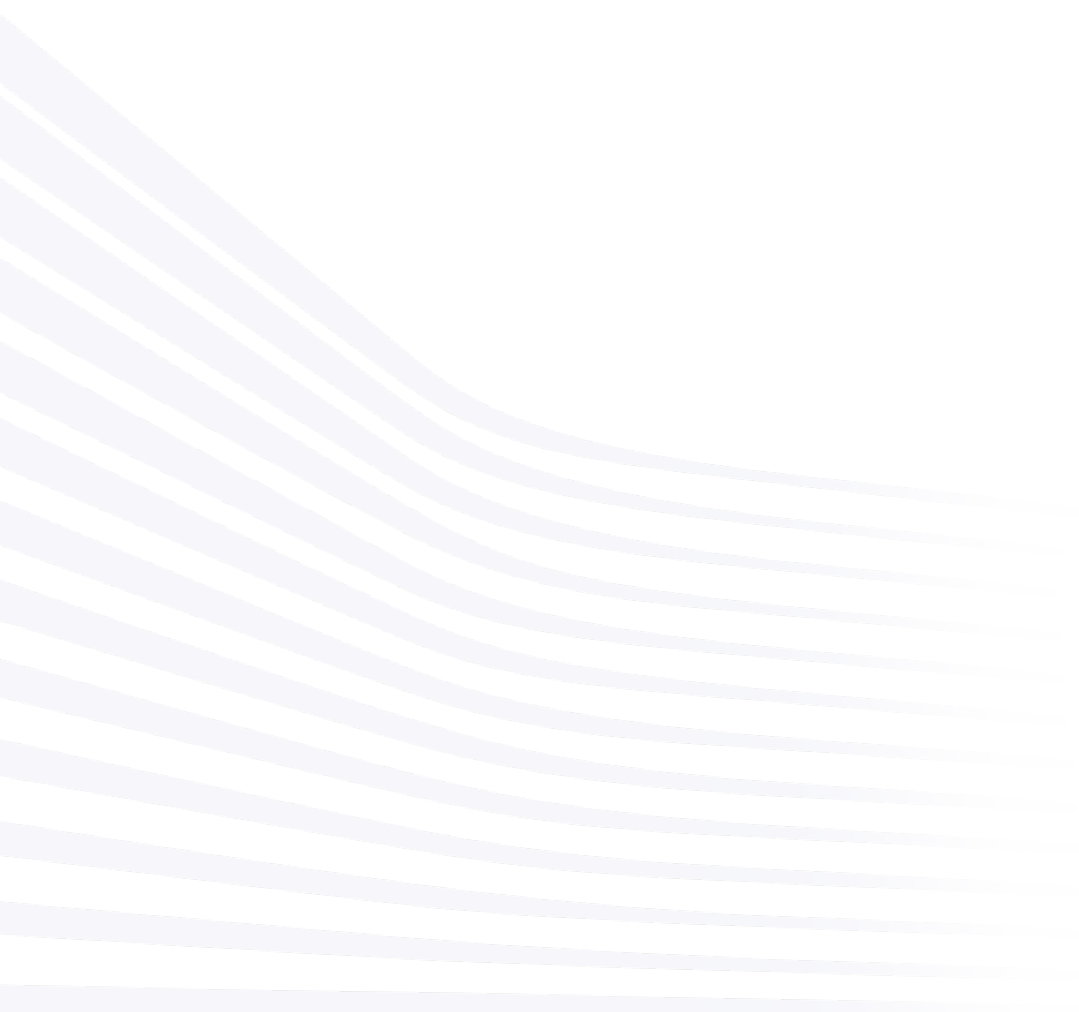

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The conductors in the cable are too thin. Overheating of the cable can cause parts of the insulation of the cable to disintegrate and thereby expose live sections of the cable which may be touched. Furthermore, there is a risk that the water pumped out will be under voltage. The product does not comply with the requirements of the Machinery Directive and the relevant European standard EN 60335.

Product description Submersible pump.

Risk type Electric shock

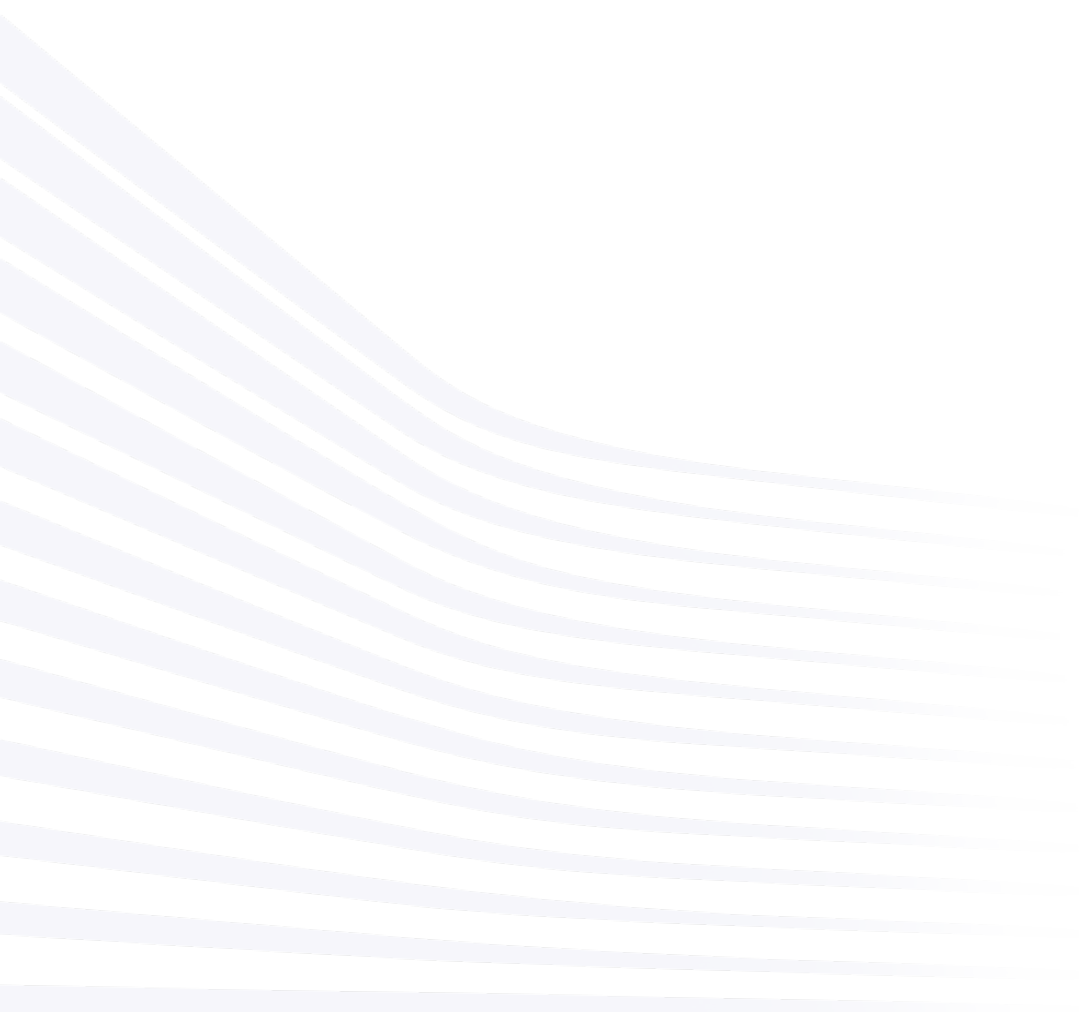

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The cables are not correctly marked. It is thus impossible to assess whether the cable meets the requirements of heavy-duty rubber-insulated cables. There is a risk that the cable is not suited to contact with water and that the user could consequently receive an electric shock on contact with the water. The product does not comply with the requirements of the Machinery Directive and the relevant European standard EN 60335.

Risk type Chemical

Legal provisions (at EU level) and European standards against which the product was tested and did not comply

The product contains the aromatic amine o-toluidine (measured value 48 mg/kg). Aromatic Amines can cause cancer, cell mutations and affect reproduction. The Council of Europe Resolution ResAP (2008)¹ on requirements and criteria for the safety of tattoos and permanent make-up, recommends that aromatic amines with carcinogenic, mutagenic, reprotoxic or sensitising properties should neither be present in tattoos and permanent make-up products nor released from azo-colourants. The product does not comply with the national legislation.

Country of origin	United States
Measures ordered by public authorities	Ban on the marketing of the product and any accompanying measures Other

Notifying country	Germany
Product category	Motor vehicles
Type	Consumer
Product	Passenger car
Name	7 Series
Brand	Bmw
EC-type approval/model	Type: 7 L. EC type-approval: e1*2007/46*0276. Model: G11 and G12
Production dates	The vehicles affected were produced between October 2014 and June 2015.
Product description	Passenger car
Risk type	Injuries
Legal provisions (at EU level) and European standards against which the product was tested and did not comply	There might be a metallic stamping residue inside the housing of the airbag control unit. In case of a crash, it might come into contact with the circuit board and cause a short circuit. As a result, the airbags would not deploy, thus increasing the risk of injury to the occupants.

Production dates Only right hand drive vehicles are affected. Vehicles produced from 09/02/2016 to 14/03/2016

Product description Passenger car

Risk type Injuries

Legal provisions (at EU level) and European standards against which the product was tested and did not comply The Restraints Control Module harness connector has the passenger side pre-tensioner wired to the driver's side connection and driver's side pre-tensioner to the passenger side connection. In this condition, in the event of an accident where the pre-tensioner system would deploy and the passenger seat is unoccupied, the driver's seat belt pre-tensioner will not deploy. As a result, the driver will not be restrained as intended and the risk of injury to the driver may be increased.
